

SYSTIMAX® VisiPatch® 360 SYSTEM

Technical Documentation

The SYSTIMAX® VisiPatch® 360 System is a new generation of patching systems that seamlessly incorporates patching and integrated cable management to deliver an ergonomically designed and aesthetically pleasing solution that saves time, space and money.

The VisiPatch 360 System utilizes a unique reverse patching technology that allows the patch cord to be projected away from the user and into the patching field. This design improves cord management by reducing the “spaghetti” cord clutter associated with poorly installed RJ-45 systems and makes reading the labeling information easy, facilitating future moves, adds and changes.

Both port density and usable density are increased in the VisiPatch 360 System. Because of cable and patch cord congestion in traditional RJ-45 systems, the usable density is lower than the port density. The new VisiPatch 360 System, however, is designed to maximize usable density by minimizing cable and cord congestion.

The new VisiPatch 360 System is available for wall-mount as well as rack-mount and cabinet installations. Plus, its modular design means that it is available for small and large installation needs.

Key VisiPatch 360 System features and benefits

- ▶ Best-in-class transmission performance
- ▶ Supports 10 Gb/s and 1 Gb/s Ethernet applications
- ▶ Compact ergonomic components
- ▶ Modular, scalable and flexible
- ▶ Increased port density and usable density
- ▶ Easy access to patch plug
- ▶ Snap-together components
- ▶ Unique reverse patching technology
- ▶ Clear and simple port labeling
- ▶ Sleek and elegant design
- ▶ Integrated horizontal and vertical cable and patch cord management

SYSTIMAX®
VisiPatch® 360
 SYSTEM

Back Panel ▶▶▶

Depth for
 10 Gb/s cable

Interlocking
 tabs for quick,
 easy stacking

Leveling medallion for easy
 installation and alignment

Wiring Block/Connecting Block ▶▶▶

Integrated label
 holder for easy circuit
 identification

One-piece cover for
 quick, easy installation

Open back and channel
 guides for easy cable
 management

Up to eight
 4-pair ports per
 wiring block for
 high density

New IDC contact design and
 compensation for improved
 electrical performance

Two options for
 simple detaching
 and re-latching
 the wiring block

Patch Cord ▶▶▶

Compact, ergonomically
 designed plug for ease of use

4-pair and 1-pair
 patch cords available

Clear demarcation of
 gripping points for quick
 and efficient patching

Labeling area for
 additional circuit
 identification

Integrated anti-
 snag design for
 frustration-free
 MACs

Cable Management ▶▶▶

Depth for
 cord slack

Cable /cord
 retainers for
 cable/cord
 management

Spacer module for
 easy installation,
 alignment and
 spacing

Horizontal cable
 trough and cover
 increase aesthetic
 appeal

Vertical Trough Cover ▶▶▶

Sleek, fully
 integrated
 handles for
 reduced
 snagging on
 clothing or
 cables

Double-hinged
 for convenient
 opening on right
 and left sides

Easily removed by
 lifting both
 handles

Available in 12U
 and 7 ft (future
 availability) for
 wall-mount and
 rack-mount or
 cabinet
 applications

▶▶▶ Electrical Specifications

Insulation Resistance	>1000 MOhms min.	Dielectric Withstand Voltage	1,000 VAC RMS, 60 Hz minimum, contact-to-contact and 1,500 VAC RMS, 60 Hz minimum to exposed conductive surface	Fault Current Test	7 A for a minimum of 5 seconds
Current Rating	2.0 A @ 20° C (68° F)			UL, CUL, CE, Austel	Listed
EIA/TIA Category	6A				

¹ Insertion Loss margin is calculated based on 12m of 95 series cordage and 88m of 91A series cable plus 4 connections. If the total cord length in a 100m channel has to be greater than 12m, please refer to the GigaSPEED X10D Design and Installation Guidelines for the instruction on how to scale cable and cord length properly.

² Guaranteed Channel Performance Margin for registered SYSTIMAX SCS installations performed by a SYSTIMAX BusinessPartner in accordance with the GigaSPEED X10D Design and Installation guidelines.

³ Note: The table provides reference values only. All parameters comply with the governing equations given above over the entire frequency range. All values and equations apply to worst-case channels utilizing four-pair 91A series cables with full cross-connects, consolidation points and work area outlets (4 connections in a channel) for the length up to 100 meters.
